Notre Dame’s School of Medicine (Sydney) and the Collaborative Research Network invite you to hear about:

The Heart Foundation Research Program

Frank Anastasopoulos, Acting National Director Research

The Heart Foundation Research Program seeks to promote and facilitate high quality research into the causes, diagnosis, treatment, management and prevention of cardiovascular disease, including heart disease, stroke and blood vessel disease.

The Research Program seeks to:
- Fund outstanding research across the areas of biomedical, clinical and public health research.
- Foster the researchers of the future
- Encourage innovative research
- Facilitate better links between research and health outcomes
- Support multidisciplinary, institutional and sectoral collaboration
- Supports the translation and use of knowledge generated by cardiovascular research

Date: Tuesday 12th November 2013
Time: 9.15 am AWST for ~1 hour
Venue: Video conference to Fremantle Campus Fremantle ND1-201 (Chancellors Room) From Notre Dame School of Medicine, Sydney Campus

RSVP to heather.clarke@nd.edu.au

The Notre Dame CRN project is supported through the Australian Government’s Collaborative Research Networks program
